## PROFESSIONAL SUMMARY

Full Stack Developer (MERN) with hands-on experience designing and deploying production-grade REST APIs, responsive React interfaces, and cloud-integrated IoT systems. Proficient in TypeScript, Node.js, MongoDB, and modern DevOps tooling. Adept at building scalable, secure, and maintainable architectures — from authentication layers to edge-ML firmware. Seeking a full-stack or frontend engineering role where performance and user impact drive every decision.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, Python, C, C++

**Frontend:** React.js, Next.js, HTML5, CSS3, Bootstrap, Responsive Design

**Backend:** Node.js, Express.js, NestJS, REST APIs, JWT Authentication, Role-Based Access Control

**Databases:** MongoDB, MySQL, Firebase

**Tools & Platforms:** Git, GitHub, Docker, Postman, VS Code, ThingSpeak, CI/CD (basic)

## EXPERIENCE

### Full Stack Developer Intern (MERN) | SmartBridge Pvt. Ltd. x APSICHE | Jul 2025 – Aug 2025 | Remote

- Engineered and deployed 3+ full-stack MERN applications integrating React frontends with Express.js/Node.js backends, targeting real-world user workflows.
- Implemented RESTful API architecture with JWT-based authentication and protected route middleware, reducing unauthorized access to zero in testing scenarios.
- Collaborated in an Agile-style sprint cycle, delivering feature-complete modules within 2-week iteration windows across a cross-functional virtual team.

## PROJECTS

### AI-Powered Resume Analyzer — MERN + AI Integration | 2025

- Built a production-grade MERN application that parses uploaded resumes, extracts skills using NLP, and generates ATS compatibility scores with actionable improvement suggestions.
- Architected RESTful APIs in Express.js handling secure multipart file uploads, resume parsing pipelines, and keyword-matching against 50+ job-role taxonomies.
- Managed persistent storage with MongoDB schemas for user profiles, resume history, and analytics — supporting concurrent multi-user sessions without data collisions.

### Blog Platform REST API — Node.js / Express.js / MongoDB / JWT | 2024

- Designed and shipped a secure, modular blog backend exposing 15+ endpoints with full CRUD support for users, posts, and comments.
- Implemented JWT-based stateless authentication with role-based access control (admin/author/reader), enforcing permission boundaries at the middleware layer. Structured the codebase with MVC separation, enabling independent scaling of controllers and route handlers — reducing future contributor onboarding time.

### IntelliRoom AI –Smart Hostel Energy Saver — MERN + IoT +ML | 2026

- Developed an ESP32-based system to monitor real-time energy and environmental data.
- Deployed a Flask API with Random Forest/Decision Tree models for energy wastage detection and added MediaPipe-based gesture control .
- Built a React dashboard for visualization, using Node.js and MongoDB for backend, data logging, and RESTful communication .

## EDUCATION

### B.Tech – Computer Science & Engineering (IoT) | Aditya College of Engineering & Technology, Kakinada

CGPA: 7.2 | Oct 2022 – Apr 2026

## CERTIFICATIONS

ReactJS – Infosys Springboard | Machine Learning Beginner – Infosys | C++ Programming – GeeksforGeeks | Git & GitHub Essentials – IBM
