Summary

Full-Stack MERN Developer with hands-on internship experience building and deploying AI-powered and IoT-integrated web applications. Proficient in React.js, Next.js, Node.js, NestJS, and MongoDB, with a strong foundation in RESTful API design, JWT authentication, and production-ready backend systems. Specialized in Computer Science with an IoT focus, combining web development with embedded systems and machine learning integration to deliver end-to-end solutions.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL, C, C++

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, NestJS, REST APIs, JWT Authentication, WebSockets

Databases: MongoDB, MongoDB Atlas, MySQL, Firebase

Tools & Platforms: Git, GitHub, Vercel, Postman, VS Code, Figma

AI Dev Tools : Cursor AI, Claude, ChatGPT, Stitch AI, Antigravity AI

Experience

Full Stack Developer Intern (MERN)

Jul 2025 – Aug 2025

SmartBridge Pvt. Ltd.

- Built and deployed full-stack MERN applications integrating React.js frontends with Express.js/Node.js backends, delivering functional prototypes across 3 real-world workflow modules within the internship period.
- Implemented RESTful API architecture with JWT-based authentication and protected route middleware, achieving zero unauthorized-access breaches across all tested endpoints during QA validation.

Projects

AI-Powered Resume Analyzer

[GitHub](#) | MERN Stack, NLP, AI | 2025

- Developed a production-ready MERN application that parses uploaded resumes, extracts skills using NLP, and generates ATS compatibility scores with actionable improvement suggestions for job seekers.
- Architected RESTful APIs in Express.js for secure file uploads, resume-parsing pipelines, and keyword matching against 50+ job-role taxonomies, supporting multi-user concurrent sessions.
- Designed MongoDB schemas for user profiles, resume history, and analytics to enable session persistence and comparative analysis across multiple resume submissions.

IntelliRoom AI – Smart Hostel Energy Saver

[GitHub](#) | MERN, IoT, Flask, Machine Learning | 2026

- Engineered an ESP32-based IoT system to monitor real-time energy consumption, temperature, and humidity across hostel rooms, providing live data feeds to a centralized React.js dashboard.
- Integrated Flask APIs with Random Forest and Decision Tree models for energy-wastage detection, enabling automated device control recommendations based on room occupancy and usage patterns.
- Built a Node.js and MongoDB backend to visualize sensor data, log historical readings, and facilitate two-way device communication, reducing manual monitoring effort for hostel staff.

Blog Platform REST API

[GitHub](#) | Node.js, Express.js, MongoDB, JWT | 2024

- Developed a secure, modular blog backend delivering 15+ REST endpoints for user management, posts, and comments, following MVC architecture for maintainability and extensibility.
- Implemented JWT authentication and role-based authorization with three privilege tiers (Admin, Author, Reader) using middleware, ensuring granular access control across all routes.

Education

Aditya College of Engineering and Technology

B.Tech in Computer Science and Engineering (Internet of Things) – CGPA: 7.3

Kakinada, Surampalem

Oct 2022 – Apr 2026

Bhashyam Junior College

Intermediate (M.P.C) – 88.6%

Rajahmundry

Jun 2020 – Apr 2022

Certifications

ReactJS – Infosys Springboard | **Machine Learning for Beginners** – Infosys Springboard | **C++ Programming** – GeeksforGeeks | **Git & GitHub Essentials** – IBM | **AWS Cloud Foundations** – APSSDC
